iTranslate
Research Leaders Fueling HealthTech /// by 8400

Make your research drive HealthTech impact!

On a mission to bridge between academic research and industry, iTranslate is a national program for PIs from academic and medical centers to acquire the network and toolbox to fuel translational research in HealthTech.
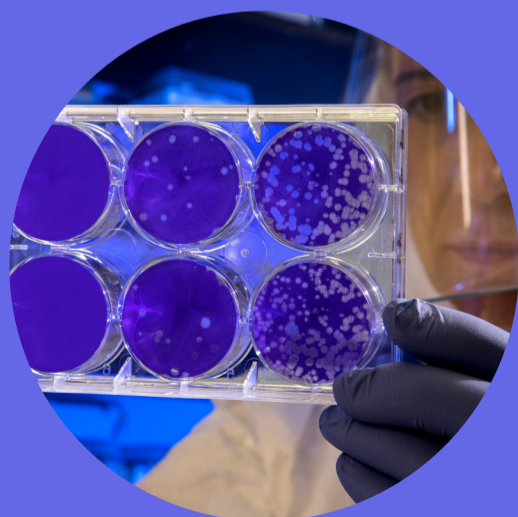

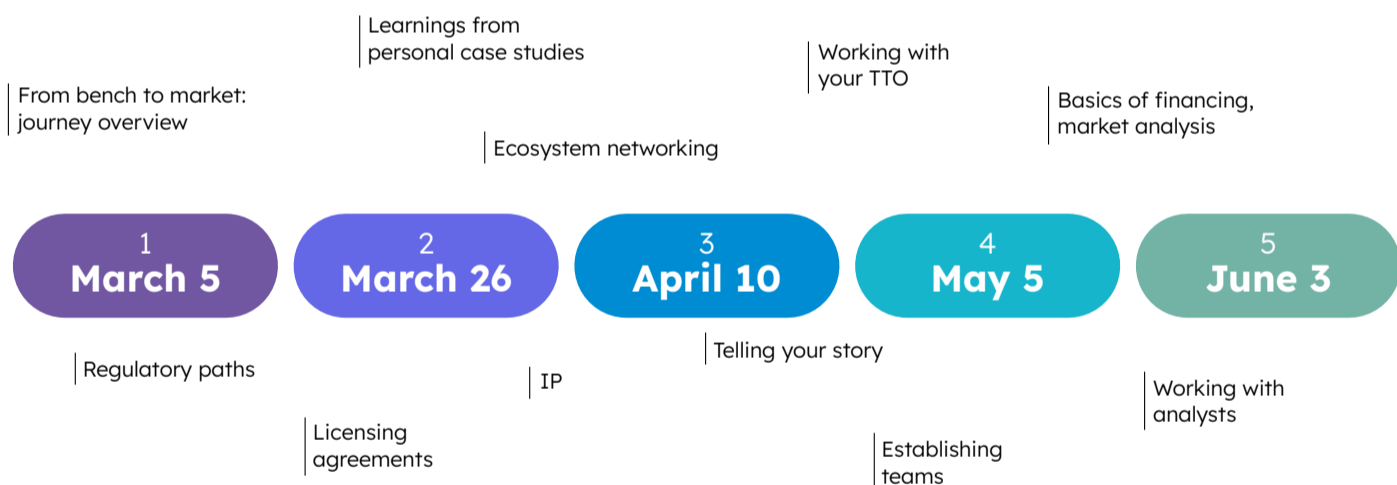

Who is this for?

If you are a PI (including physician-scientist) from an academic or medical center, seeking a better understanding of the industry and how to translate your scientific discoveries into impactful HealthTech applications - iTranslate is for you!

About the program

The program offers a unique opportunity to dive into the worlds of translational science, tech transfer and commercialization through case-study lectures, discussions, peer learning, mentoring and networking with ecosystem leaders from academia, medical centers, industry, TTOs and VCs.

What to Expect?

5 full physical program days, with 2-3 brief zoom sessions in between

From bench to market: journey overview	Learnings from personal case studies	Working with your TTO	Basics of financing, market analysis	
	Ecosystem networking			
1 **March 5**	**2** **March 26**	**3** **April 10**	**4** **May 5**	**5** **June 3**
