

The 8400 and Teva Mental Health Team: Exploring Innovative Technological Solutions for Mental Health Professionals

In the past three months, 8400 together with the incredible team of Teva Pharmaceuticals Industries, led a special Task Force aimed at finding Innovative Technological Solutions for mental health professionals, given October 7th atrocities exposed so many Israelis to Trauma, which resulted in a dramatic increase in the demand for psychological treatment, especially in the area of Post Traumatic Stress Disorder (PTSD).

With joint forces, we gathered an amazing group of experts who brought an array of professional insights from clinical treatment to cutting-edge technology, from the MOH, IIA, MAFAT, industry, startups, hospitals, HMOs, health organizations, and other individuals, to create solutions to promote the identification and implementation of technologies into the Israeli Mental Health System.

We thank Teva, who also is leading **"Support the Soul" Program** for its tireless commitment to the professional caregivers in Israel, who are working tirelessly to tackle this challenge.

If you are part of the Mental Health Ecosystem and you'd like to offer your support, please contact us at Taskforce@8400thn.org.
