MED4TECH BY 8400

MEDICAL TRAINING PROGRAM FOR TECH EXPERTS

WHAT IS MED4TECH

Med4Tech by 8400 is a clinical and medical training program for top tech talent from both local and global companies.

The program targets tech experts (e.g. Hi-Tech software and hardware engineers, data scientists and product managers) in key positions at HealthTech and High-Tech companies who are focused on expanding their basic knowledge and understanding of the clinical world: medical processes, concepts and terminologies to enhance their industry knowledge.

ABOUT THE PROGRAM

Starting in 2022, Med4Tech will hold its first hands-on clinical and medical training program.
The 6-month program will include **weekly evening online** sessions as well as **monthly full day, in person** training sessions that will take place in leading medical centers across the country.

The course will provide participants with the fundamentals of clinical medicine, regulatory challenges, clinical documentation and more. In addition, participants will take part in unique on-site practical sessions in clinical environments and obtain first-hand experience of the daily routines and real-life challenges of healthcare providers.

The sessions will be led by senior clinicians from a wide range of healthcare organizations.

Program **participation fee** of 6,300 ILS| Places are limited| Full attendance is required| Deadline for **applications** is 02/01/22| **Admission** will be driven in part by group composition considerations.
