

Top Talent SpearHeading HealthTech

In partnership with:

WHEN 'TECH' MEETS 'HEALTH' - YOUR OPPORTUNITY TO BECOME A HEALTHTECH LEADER

You are a top tech leader or business executive

You have already proven outstanding achievement in the course of your career

You are new to, inspired by and excited about the HealthTech opportunity

You wish to build a new HealthTech venture or to become an executive in a leading healthTech company

You are the perfect candidate for SpearHealth's third cohort!

▶ What is SpearHealth?

SpearHealth by 8400 - an entrepreneurship, education, and collaboration platform - engages top tech leaders and business executives, to fuel and stimulate the Israeli HealthTech ecosystem with new and disruptive talent. The platform creates a unique cross-disciplinary community of cutting-edge leaders, who initiate HealthTech ventures, lead innovative start-ups, and take on leadership positions in existing companies.

78 leaders have already participated in the program's first two cohorts in 2020-2021. In this short period of time, SpearHealth graduates have founded and are leading exciting early-stage HealthTech ventures, while others have joined startups and multinationals alike in key positions - all making an impact on the Israeli HealthTech ecosystem.

We are now launching Cohort #3, aiming to make the program an even greater success by pursuing a tailored approach for each participant, maximizing your chances of succeeding in founding a new venture or joining the C-suite of an existing venture.

SpearHealth is led by Eilon Tirosh, Amit Amy Meitus, Limor Sandach and the [8400 Health Network](#), in collaboration with leading HealthTech Ecosystem stakeholders, and with the support of the Israel Innovation Authority, Digital Israel and JOINT-Elka.

▶ About the Program

Starting September 2022, SpearHealth participants will commence a four-month program of tailor-made interactions, education and ideation.

Cohort participants will learn, connect and be exposed to all key milestones for venture formation and for reaching executive positions in Healthtech. During the program, participants will be introduced to specifically crafted knowledge and tools, stakeholders and trends - all feeding and stimulating their HealthTech endeavors. Case studies, workshops and hands-on learning, led by key industry and ecosystem leaders, will include an introduction to healthTech sectors, concepts in health care delivery, business models, regulatory strategy, reimbursement considerations, and emerging trends in HealthTech. During the program, participants will either pursue their venture formation or explore executive positions within existing healthTech companies, while receiving mentoring from the industry's leading talent.

Graduates will join the growing active community of SpearHealth members and benefit from on-going learning, professional mentoring and networking opportunities.

When

Submission deadline: June 12, 2022

Program: First session September 6, 2022, and then, weekly or bi-monthly meetings for 4 months.

▶ Before you apply

- The program invites applications from outstanding individuals of both tech and non-tech backgrounds. We are looking for entrepreneurs, biz dev extraordinaires, product masters, and researchers (engineering, math, computer or data sciences).
- The program requires at least 90% attendance
- Admission decisions will comply with equality, diversity, transparency and conflict of interest criteria
- A participation fee of 1,200 NIS will be incurred (~10% of the full program cost per participant)

▶ How to apply?

- **Interviews** and **reference checks** will be held up until July 3, 2022.
- Admission offers will be made by July 15, 2022.
- You can apply using the application form button below. You will need to submit the following:
 - CV – up to 1 page
 - A short bio - up to 70 words, in English, in third person, including your full credentials
 - Contact details of 2 references
 - A short essay (up to 150 words) detailing your interest in HealthTech and what you hope to gain from the program.
 - If you already have an idea or venture you're working on, do tell us about it in your short essay.
